

All of our disposable straps are manufactured in double layer soft white polyester which is double overlapped; this contributes to both a strong and flexible product. The solid Velcro fastening system allows flexible solutions for the whole body.

The most preferred fixing straps can be seen below. The size charts can be found on our website [www.danishhealthcare.com](http://www.danishhealthcare.com)

Identification number	Size	Packaging
1121	10 x 120 cm	200 pcs.
1100	10 x 220 cm	150 pcs.
1150	10 x 260 cm	100 pcs.
1101	10 x 300 cm	100 pcs.
1110	5 x 85 cm	200 pcs.
1120	5 x 120 cm	200 pcs.

Our products are sold worldwide in cooperation with the Danish Embassies and recognized retailers that are known for their expertise within surgery products.

Closest retailer can be found at [www.danishhealthcare.com](http://www.danishhealthcare.com) or contact us directly at [info@danishhealthcare.com](mailto:info@danishhealthcare.com) for further information.

# Positioning straps during anesthesia

Hygiene standards within modern hospitals are higher than ever. Even though there is a lot that is being done to prevent infections, the increasing workload put on hospital personal means that it can be difficult to go through all the safety guidance and procedures in a satisfactory manner.

Generally there are good hygiene standards within hospitals in Europe, but the growth of complexity of the surgical procedures on patients that are increasingly ill, entail that the risk of infection for the patients increases as well.

That's the reason why at Danish Healthcare we recommend that all the surgical products are of single use only.

It starts with possibilities

## Which advantages are associated with the use of disposable products:

- Reduction of the risk associated with MRSA infection
- Reduction of the cost due to surgical wound infection
- Reduction of laundry and cleaning expenses
- Increased productivity
- Environmental friendly - can be disposed with the normal waste from the operating room

At Danish Healthcare we have over 10 years of experience manufacturing and retailing hygienic disposable positioning straps that can be used under anesthesia. The first positioning straps were developed to accommodate hospital accreditation standards and disposable straps are now commonly used by most Danish and Swedish hospitals.

We can manufacture large quantities of straps in all sizes, for example as pictured a 20 x 220 cm strap, custom made to meet one of our client specifications.

Danish Healthcare collaborates with SGS, which is a leading testing institute.

All of our standard products are labelled with CE-label even though it is not a requirement in Denmark.

## Green policy

Since 2014 we at Danish Healthcare have formulated a green policy. This policy is in accordance to all EU-provisions and regulations also in Danish law. Our green policy is based on a sustainability mindset.

At Danish Healthcare we are always making sure that our products have been tested for chemical residues and manufactured in an environmental friendly manner. Our products are tested for allergens as well.

We are engaged in offering high quality disposable products.

Even though the amount of infections in Scandinavia and the Netherlands is going downward, we see the need for keeping the use of new products securing a positive development within the surgery field. Therefore we at Danish Healthcare keep working for being ahead of the development and we regularly keep launching new products.
